

Project Title: Management System

Authentication Module

Implement authentication using a **Custom User Model**.

Features

1. User Signup
2. User Signin (Login)
3. Only authenticated users can access CRUD pages.

Model 1: Employee

Create a model named **Employee** with the following fields:

- Name
- Email
- Phone
- Department
- Salary

Perform the following operations:

- Create Employee
- Read Employee List
- Update Employee
- Delete Employee

Model 2: Product

Create a model named **Product** with the following fields:

- Product Name
- Category
- Price

- Quantity
- Description

Perform the following operations:

- Create Product
- Read Product List
- Update Product
- Delete Product

Model 3: Student

Create a model named **Student** with the following fields:

- Name
- Roll Number
- Email
- Course
- Semester

Perform the following operations:

- Create Student
- Read Student List
- Update Student
- Delete Student
